

UCS1611 INTERNET PROGRAMMING LAB

Exercise 2: Website for International Conference using CSS

Name: Yasir Manzoor Itoo

Roll no.: 185001203

Class: CSE C

Date: 21-02-2021

Learning objective of the experiment:

To Develop a Website for an International Conference using HTML5 and Cascading Style

Sheets. Use the website you designed using HTML5.

Specifications: While designing the web page:

- Use Inline, Embedded, External Style Sheets.
 - Use box model, outline concepts.
 - CSS concepts with table, list, links, forms, anchor etc.
 - Write rules with rule cascading and inheritance.
 - Include Tooltip, Icons, Graphics, Animations, and Transformations
-

<h1>PROJECT PAPERS</h1>
<br> <br> <br>
<p>Any fantastic class projects come from students picking either an appl
ication area that they're interested in, or picking some subfield of mach
ine learning that they want to explore more. So, pick something that you
can get excited and passionate about! Be brave rather than timid, and do
feel free to propose ambitious things that you're excited about. (Just be sure to
ask us for help if you're uncertain how to best get started.) Alternativ
ely, if you're already working on a research or industry project that machi
ne learning might apply to, then you may already have a great project ide
a.</p>

REGISTRATION

Learning Outcomes:

- I have learnt to design a website using the HTML and its semantic elements and the attributes while integrating it with the elements present in CSS.
- I have learnt to use embedded, inline and external CSS and their incorporation into HTML files.
- I have learnt to include navigation features with highlighting and hovering effects that enable the end user to navigate through the web page in a hassle-free manner.
- I have learnt about the advantages that come with using CSS elements as opposed to their HTML corresponding attributes and elements.
- I have learnt to implement classes and inheritance features and rule cascading

and explored various changes that come with changing of the above-mentioned

rules.

- I have explored various facets of HTML and CSS elements such as lists, tables,

forms and how they can be integrated to enhance user interface.
